

Xtrackers MSCI Pacific ex Japan UCITS ETF

The aim is for your investment to reflect the performance of the MSCI Pacific ex Japan TRN Index (Index) which is designed to reflect the performance of the listed shares of certain companies from developed countries in the Pacific, as classified by MSCI Inc. (MSCI) and as shown on the website of MSCI (www.msci.com/market-classification). The companies making up the Index are large and medium sized companies based on the combined value of a company's readily available shares as compared to other companies. A company's weighting in the Index depends on its relative size. The Index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The Index is reviewed and rebalanced at least quarterly. To achieve the aim, the Fund will attempt to replicate the Index by buying all (or, on an exceptional basis, a substantial number of) the shares in the Index in the same proportion as they have in the Index as determined by the Sub-Portfolio Manager of the Fund which is Deutsche Asset Management (UK) Limited. The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund. No dividends will be paid on your shares. You may redeem your shares on demand on a daily basis.

Key Information

Name	Xtrackers MSCI Pacific ex Japan UCITS ETF
Provider	Xtrackers
Trading Currency	USD
Fund Currency	USD
Operating MIC	XSES
Index Name	MSCI Pacific ex Japan Index
